BOATBUILDERS

“ From my earliest memories, I have always wanted to build boats.”

Lloyd Stevenson

Boat Builder

LSB Catalysts

The Catalyst

Designed for Emirates Team New Zealand Americas Cup team by Morelli & Melvin as a chase boat, these high-performance catamarans were previously built by Salthouse Boats, receiving a new home with Lloyd Stevenson Boatbuilders in 2020.

Constructed from strong and lightweight composite with carbon reinforcements, the hull has proven to be a highly customisable platform, excelling at every task it has been asked to perform.

Of the 25 built so far, no two are the same. Completed to Lloyd Stevenson Boatbuilders' usual high standards, everything can be customised to meet our client's specifications. From the hull - ranging from 11.5m (38ft) to 18m (60ft) in length, to the cabin - where the original cabin design can be utilised or, in consultation with our in-house design team, a completely custom cabin layout can be created (see the Catalyst GT featured on pages 18 &19).

Customisation is not limited to the hull and superstructure. The engines used to push these boats through the water are also up to the owner. Our most recent Catalyst is powered by quad, 450 Mercury racing motors capable of 60 knots (69 mph); twin diesel inboards, hybrid and water-jet units are also an option.

If you are looking for a powerful, lightweight, low-maintenance, very capable sea boat with exceptional ride and handling, built to industry-leading standards, that was created specifically for you – read on.

Testimonials

“The owner of this boat had some unique requirements. We looked around and there really isn’t anything out there. It was an awesome experience to finally grab the helm... it’s remarkably different to any RIB I’ve ever driven before; way more stable, faster, more manoeuvrable; it ticks every box there is. From start to finish, it has been an incredible journey in professionalism, all the way from the boardroom to the guys who are working on the boat... I fully recommend Lloyd Stevenson Boatbuilders to any person out there who was thinking about making their dreams come true.”

*Tony Mutter
Owners Representative S/Y Skorpios*

“This vessel, I knew it was going to be good, but the system installation and engineering capability matches anybody or exceeds anybody else in the world. Lloyd Stevenson Boatbuilders have a worldwide name for quality; they have the experience with superyacht tenders; they have the ability to understand the standard that we require”

*Captain Aaron T. Clark
Owners Representative & Captain, M/Y Artefact*

History

YouTube videos from Emirates Team New Zealand and Alinghi Red Bull Racing America's Cup Teams featuring their Catalyst chase boats.

Alinghi Red Bull Racing's Catalyst at work – April 2024

From 2012. Training with the first AC75 Catamaran

From 2023. Barcelona on water operations

40 Years of Excellence

In 1985 Lloyd built his first boat, a Davidson 42 sail-boat named Teddy Bear.

Over the next forty years, with Lloyd's relentless drive for excellence, the team at Lloyd Stevenson Boatbuilders built an enviable reputation for quality and fine craftsmanship, amassing an impressive portfolio of bespoke sail-boats and motor yachts of the highest quality.

From private motor yachts to carbon fibre race yachts and cutting-edge superyacht tenders, our in-house experience allows us to undertake the most complex of projects.

With our purpose-built factory, we pride ourselves on adopting new technologies around construction whilst retaining the ethos and quality of traditional boat building.

The Benefits of Lloyd Stevenson Boatbuilders

Lloyd Stevenson Boatbuilders have only ever built custom boats. Crafted to the highest standards, our reputation for quality of construction and finish has been earned over 40 years of working with some of the world's best designers.

The value of a Lloyd Stevenson Boatbuilders custom-built boat can be summarised very simply.

- Partnership** – Our philosophy is to partner with you to craft a vessel that exceeds expectation.
- Passion** – As many of us are passionate boaters, we all know how important your boat is to you. All of us are 100% committed to building you the finest possible boat we can.
- Hand Crafted** – Using the best materials available and finished to the very highest standards, your boat is handcrafted by people who love what they do.
- Experience** – It is not just about building a boat. We strive to make the entire experience as enjoyable and seamless as possible. This does not end once you take delivery – we provide worldwide support to our fleet if required.
- Exclusive** – Lloyd Stevenson Boatbuilders are one of the world's best-kept secrets. You join an exclusive club when you build a boat with us.
- Value** – With the quality of materials, construction methods and finishing, custom-built boats are very durable and maintain their quality finish well into the future. Additionally, we quote in NZ\$, with a very favourable exchange rate for our international clients.
